Colour:	clear
Thickness:	195µ
Width of rolls:	42"
Length of rolls:	35 meters
Flame retardant:	no
Compatible inks:	
Eco solvent:	yes
Solvent:	yes
UV-curable:	yes
Latex:	yes

Description:

EMBLEM SOCF is a glossy clear film with one-side coating for solvent and eco-solvent inks. The print is waterproof with brilliant colours.

This special film is laying flat and the typical use is: glas-decoration, exhibitions, backlit

Advise for workmanship:
the drying of the printed medium is highly dependent on the inks used as well as the solvent coating and the colour saturation. We recommend not to print in a roll-to-roll process. Using high volume of inks may cause drying time of 2 to 3 days.

Solvent residues due to insufficient drying times can lead to blocking during transport in rolled-up form. During lamination such residues can negatively impact flatness, the shrinkage behaviour and the anchorage of the laminate on the printed film.

We recommend to protect the printed surface if it is subject to abrasion, sweat or other mechanical influences. In this case we recommend to protect the image with laminating film.

To avoid fingerprints the use of cotton-gloves is advisable.

Small print

Because of the great number of potential influences at object time and appliance of the above-mentioned materials, on which we have no bearing, test prints have to be effected by the user himself. A legally binding warranty can not be deduced from our specifications. Every liability and warranty that goes beyond the warranty of the product amounting to the product's value as well as entitlements to damages are excluded.
