ClingZ®

ELECTRICALLY CHARGED
POLYPROPYLENE

ClingZ® is an adhesive-free electrically charged film that adheres to any dry interior surface and is effortless to reposition.

ClingZ

Ideal for temporary indoor marketing applications

Effortless to apply, remove and reposition to any dry interior surface

Adhesive free – no glue, tape, tacks or pins required

Recyclable, chemically inert, PVC-Free and phthalate-free

Can be die cut, kiss cut and plotter cut

Available in white and clear

Four grades engineered specifically for offset (ClingZ® Standard Offset and ClingZ® Versaliner), HP Indigo and UV wide format

Print Compatibility: Offset (Conventional and UV), HP Indigo and UV Wide Format*

Easy to apply and remove from these surfaces:

PAINTED WALLS	WALLPAPER	WOOD PANELING	BRICK
CONCRETE	POLISHED STONE	STAINLESS	GLASS

ClingZ is not to be confused with Static Cling Vinyl. Static Cling Vinyls cling to glass because of their high plasticizer content. **They do NOT cling by static.** Only ClingZ gets its cling properties due to having an embedded static charge.

Applications

Screen Safe Labels

In-Store Promotional Signage

Large Format Graphics

Tileable Murals

P.O.P. Signage

Reverse Sided Graphics

Trade Show & Event Signage

Window Graphics

Holiday Décor & Decals

Guerrilla Marketing

Outdoor Durability	None					

General Printing and Designing Guidelines:

· Design for finished sizes of at least 3"x5" (8x12 cm).

· Convert PMS spot colors to CMYK process-ink builds.

· Stay within a total area coverage (TAC) of 220% in color build with a line screen of 150-175, and reduce screen values by using UCR or GCR.

· Avoid heavy deposits of ink near the edge to avoid curling.

· Right reading or reverse printing is possible.

· A 1" (2.5 cm) unprinted border will enhance the performance of the application.

· Add no more than 2 hits of opaque white before 4-color process when printing on clear film.

· Add white after the 4-color process if printing verse.

· This product is not suitable for screen printing or any type of coating, including varnishes or aqueous and UV coatings.

Storing:

· Store in the original packaging at room temperature 65° F-80° F (18° C-27° C) with relative humidity of 25-50%.

· Acclimate the material to press room temperature for 24 hours prior to printing.

· Remove material from plastic bag right before the loading the press.

· Reseal unused materials in the original plastic bag.

· Paper liner is moisture sensitive and can curl if improperly stored.

· Unprinted ClingZ can be stored for up to one year.

Additional Information:

· ClingZ is not to be confused with static cling vinyl. Static cling vinyls adhere to glass because of their high plasticizer content. They do not cling by static. Only ClingZ gets its cling properties due to having an embedded static charge.
