

PhotoMount™ Adhesive

Product Data Sheet

Updated : February 1997
Supersedes : February 1996

Product Description

Improved 3M PhotoMount™ is a professional grade adhesive which provides a permanent bond for mounting photographs, maps, prints and drawings. It can be used on most porous and non porous materials. It is a clear adhesive and slow drying to allow a short time for pinpoint positioning before final bonding. The new controlled spray pattern greatly reduces adhesive mist.

Physical Properties

Not for specification purposes

Solvent	Petroleum Distillates, Pentane, Acetone	
Flash Point	-46°C (propellant)	
Propellant	Propane, Hydrocarbon	
Contents	400 ml (260g)	
Spray Pattern	Particle	
Colour	Clear	
Shelf Life	12 months from date of receipt by customer when stored in the original carton at 21°C (70°F) & 50 % Relative Humidity	

Additional Product Information

Does not contribute to ozone depletion.

Date : February 1997
 3M PhotoMount™ Adhesive

Storage Conditions	Cool dry place. Best results are obtained when material is stored and applied at room temperature 16 to 27°C. Storage temperature must not exceed 49°C.
---------------------------	---

Directions for Use	<p>Ensure all surfaces to be bonded are clean, dry and free from dust, oil and grease before application of adhesive.</p> <p>Ensure that the nozzle points away from all persons and towards the surface to be sprayed. Turn the spray tip to select the desired spray width.</p> <p>Shake can well before using, 5-10 seconds should be sufficient.</p> <p>Hold the container 15 to 20 cms from the surface and apply evenly to cover the entire area.</p>	<p>To bond porous materials (such as paper, board and fabric) apply to one surface only and place in position while the adhesives is still wet. For non porous materials (such as metal foils, plastics and film) spray adhesive onto both surfaces and let adhesive become aggressively tacky before bonding.</p> <p>To prevent nozzle from blocking, at the end of each day turn the can upside down and press the tip until spray is clear from adhesive, and wipe tip.</p>	<p>Clean Up: Spray nozzle or excess adhesive may be cleaned with white spirits.</p> <p>NOTE: When using solvents for clean up, it is essential that proper safety precautions are observed.</p>
